

Microsite News: Link to RoHS Stats

FCI, Etters, PA, has set up online help for those concerned with meeting the Chinese RoHS environmental regulations that went into effect on March 1. A link specific to the Chinese regulations has been added to the company's RoHS microsite to allow readers to search by product for detailed information about each connector's compliance with the new specifications. The microsite displays the circle-e symbol for part numbers that are Chinese RoHS-compliant. Information on European RoHS compliance is also available. For part numbers that do not yet define their compatibility via the web site, customers can e-mail Global.RoHS@FCIconnect.com for more information.
