

Free Poster: Particles & Cells

A colorful wall poster from Fluid Imaging Technologies, Yarmouth, ME, shows actual images of 30 different particles and cells as imaged by FlowCAM particle imaging and analysis system. It features sugars in chocolate, natural vitamins, juice pulp, glass microspheres, paper pulp, and a variety of other particles and cells as well as a stunning set of algal cells and other waterborne microorganisms. The poster measures 24 x 18 in. for placement in offices, cubicles, and laboratories. It's available free at www.FluidImaging.com.
