

Pollution Control Bulletin

Spray nozzles and systems for wet flue gas desulfurization, acid gas treatment, NO_x reduction, mist eliminator washdown, chemical injection, and gas conditioning are the focus of a new bulletin published by Spraying Systems Co., Wheaton, IL. The bulletin provides an overview of many spray solutions available to plants with pollution control requirements. Spraying Systems Co. is the global leader in spray technology. More information is available at www.spray.com or by contacting the company 630-665-5000.
