

CAGI Data Sheets: A Performance Comparison

Werner Rauer, Compressors Product Manager, Kaeser Compressors, Inc.

Comparing compressor performances across different manufacturers has long been a difficult task. For a many years, it was all too easy to present data that, although accurate, was potentially misleading. Manufacturers were selective about what information they published as well as what conditions they chose to specify performance. The result was a numbers game that the buyer frequently lost.

Fortunately, the [Compressed Air and Gas Institute \(CAGI\)](#) [1], in cooperation with its members, has developed a tool for a fair comparison between compressors. CAGI is a non-profit organization of competitive companies that manufacture air and gas compressors and related equipment. [CAGI](#) [2] seeks to educate end-users to promote effective, safe, and energy efficient uses of compressed air and gases.
