

Here, There, Everywhere: Rugged Computers Enable True Workforce Mobility

Dale Kyle, CEO of Handheld US

We're in the midst of a radical shift in the way people live, work and communicate. New and continually improving technological advancements are opening the doors to a truly mobile future for the global workforce.

Does this sound like old news? After all, some might argue that this shift has been happening for decades — and they'd be mostly right. Gone are the clunky mobile devices, wired telephones and dial-up Internet connections of the 20th century, and the amount of computing power we can fit into a few inches of space these days is nothing short of mind-boggling.

But it's my opinion that, until very recently, some significant obstacles prevented most workplaces from seeing true mobility as more than some nebulous future ideal.
