

A Fireside Chat: U.S. Gave Up on Manufacturing for Short Term Profits

PD&D Staff

Miniature fluid handling specialist Bio-Chem Fluidics has announced its new Vice President of Operations, Joe Turiello. In his new position, Turiello will work with the manufacturing assembly, quality assurance, purchasing and customer service groups to support the company's growth.

Turiello has over 30 years of engineering and management experience. He was most recently the manager of advanced manufacturing and product engineering for ITT Space Systems (Clifton, NJ). He holds a Bachelor of Science in Industrial Engineering from the New Jersey Institute of Technology (Newark, NJ), and has completed the Six Sigma process improvement certification.

PD&D caught up with Turiello to talk to him about his new position, the future of Bio-Chem, and his thoughts on the industry.
