

Bremen Castings: Making Heavy Industry a Safer Place

Joel Hans, Managing Editor, Manufacturing.net

Bremen, Ind., is a small town of about 5,500 people roughly 15 minutes south of the South Bend/Elkhart area. And one of its major employers, Bremen Castings Inc. (BCI), has been around long enough, having been established in 1939, to gain a reputation of being one of the area's best employers. And after more than 70 years of continuous operation, the company's products in gray and ductile iron machined castings have gained a similar reputation worldwide for being made with the type of quality that has long been associated with American manufacturing.

But back in 2010, BCI's executives and upper management decided its plant floor safety initiatives needed an overhaul. JB Brown, the company's current president and fourth-generation employee, is quick to point out that the operations weren't dangerous before, but strong growth and an increasingly public stature necessitated a more robust system to finding and resolving potential safety hazards. In 2010, BCI hired a safety manager and gave her a "big stick" to make serious results stick.
