manufacturer of conveying, screening and separating equipment for the processing industries. Our diverse product line includes vibrating equipment, components and systems each tailored to the specific customer and their application, including the original Horizontal Motion Conveyor, the innovative Slipstick®, the Texas Shaker® Precision Screener, and the Sutton line of Granulators, Gravity Separators and Stoners. Today, Triple/S Dynamics has the same mission of its pioneering founders: partnering with our customers to identify their processing objectives and challenges, providing solutions through research, development, engineering expertise and quality manufacturing.
