

Hydrogen Peroxide-based Cleaner

The Clean by Peroxy chemical management system manages chemical consumption and controls proper dilution ratios with accuracy. It is easy to use and makes cleaning more economical since the dispenser is engineered to draw product from standard one- and five-gallon containers or 30- and 55-gallon drums. It is now Green Seal certified, meeting the formulations standards of the GS-37 for institutional and industrial cleaners. The all purpose hydrogen peroxide-based cleaner can be used by anyone working from either bulk or two-liter product containers.
