

Rotary Switches

Series 24 Detent-Action Rotary Switches have a continuous rating of 30 amps at 600 volts. They feature fully-enclosed decks and self-cleaning, double-sided, double-wiping contacts for low resistance contacting and reliable service. They can be configured with up to eight positions and up to 20 poles. Their construction features molded phenolic insulating disks that provide a minimum insulation resistance of 100 Megohms.
