

Submersible Level Transducers

Same-day shipment is available for submersible Model 700 level transducers that feature 4-20 mA output in level ranges of 10, 23 and 35 H₂O ft with cable lengths of 25 ft, 50 ft and 75 ft, respectively. The transducer is shipped with an installed SuperDry vent filter for moisture protection, or an optional unattached aneroid bellows for applications where periodic maintenance is not practical and high accuracy is not required. The availability of same day shipment enables operators to get disabled equipment up and running the next day, when an order is placed by 2 PM EST.
