

Vacuum Tube Lifter

A vacuum tube lifter can be equipped with a custom four-pad attachment for lifting and packing four plastic tubs, from their tops, into cartons at the same time. The VT Series Vacuum Lifter provides a 100% continuous-duty cycle and has an ergonomic handle with up/down controls that can be set to match an operator's hand strength. Featuring a custom four-pad attachment with a quick-connect coupling, this lifter is designed for packing four 10-in. diameter plastic tubs, weighing up to 50 lbs each, into a carton at the same time.
