

Digital Display for Flow Meters

The DM20 Digital Display provides totalized flow readings from FCI's ST Series thermal dispersion mass flow meters. Designed to replace standard electro-mechanical counters, the DM20 features the latest CMOS technology and incorporates an easy-to-read single line eight-digit black and white LCD display that is 0.276 in. high. It is self-powered with a lithium battery (included), capable of lasting up to 10 years.
