

Pneumatic Actuator

Tork-Mate 890 Series extended life pneumatic actuators achieve up to 15 million cycles maintenance-free. They are ideal for 90-degree and 180-degree turn devices such as butterfly valves, ball valves, plug valves and damper valves. They meet the latest NAMUR standards, allowing direct or close coupling of NAMUR designed accessories. Custom options include Viton seals, high temperature trim, special finishes, stainless steel pinions, special mounting configurations and special coupling configurations.
