

Mass Flow Meter

Booth A2436 - The OPTIMASS Series 7000 and 3000 (formerly 7100) coriolis flowmeters are used for precise blending, dosing and batching applications and are designed specifically to handle low flow applications to high flow applications. Available in many sizes, they are suitable for flow rates from 0.55 lbs/min to 15,800 lbs/min. In addition to flow rates, the OPTIMASS measures density, temperature and concentration. They incorporate secondary pressure containment with the option of a heating jacket, and are available with wetted parts in titanium, stainless steel or Hastelloy.
