

Compact Vacuum/Pressure Pumps

Company offers the Air Cadet line of newly-enhanced diaphragm vacuum/pressure pumps. Enhancements include improved diaphragm durability, increased vacuum and pressure performance and upgraded switch control. It is particularly well-suited for both high-flow and low-flow applications where compact, chemical resistant pumps are needed. Available models include 115 VAC, 230 VAC and portable 12 VDC motor - from single-head and dual-head units to complete vacuum/pressure control stations.
