## Horizontal Pump

The Series HA is a heavy-duty ANSI dimensional horizontal pump engineered for severe chemical applications. It is machined from solid CPVC and utilizes an externally mounted mechanical seal. The 3x2x6 and 4x3x8 pumps have sleeved shafts for non-metallic solution contact while the 4x3x10 and 6x4x10 pumps utilize titanium or Hastelloy C shafts. This proven design provides high resistance to aggressive chemicals.
