

Industrial Mats

The HAM-O Universal Mat absorbs and camouflages leaks, drips and sprays of various fluids, including oils, coolants and water. Its exclusive gray and black "hamouflage" piggy pattern hides grease and grime so the mat always looks clean and stays on the job longer. The durable top scrim layer holds up to wear and tear and foot traffic, while the absorbent bottom layer traps the leaks and drips. Mats are available in an easy-to-tear, perforated roll or a convenient dispenser box for quick and easy use.
