

Pharmaceutical Packaging and Processing Equipment

Hall 3.1, Stand F2-J11 - Integrated solutions for production, validation and packaging will be highlighted by the five Bosch Companies. Sigpack Systems will be introducing a new complete line for blister packages that includes a horizontal flow wrap system with robotic feeding and end of line secondary packaging. Bosch Pharma Solid will offer a new capsule-filling machine for micro-dosing applications, a new weighing system for tablets, and a new cartoning machine for blister wallet applications. Bosch Pharma Liquid will present two new filling machines for pre-sterilized syringes, a new machine for powder filling, a new integrated filling/isolator/processing machine and a new fill and close machine for liquid pharmaceuticals. Denmark-based Moeller & Devicon will be introducing a new inspection system for pharmaceutical applications.
