## **Bulk Bag Discharger (1242)**

This unit offers patent pending features that maximize production efficiency. Type 304 stainless steel construction on all product contact surfaces ensures easy cleaning. A Seal-Master bag spout access chamber provides ergonomic spout access, while a Flo-Master massaging system promotes positive material flow. A fully integrated pivoting vibratory feeder delivers product to two existing process tanks. The feeder is easily pivoted into position with one hand and has variable speed controls for reliable performance.
