

Magnetic Flowmeter

The ENVIROMAG 2300 magnetic flowmeter offers quick and simple installation and commissioning. The unit's design incorporates a high-quality Polyurethane liner with field-replaceable HC4 Hastelloy electrodes. The flowmeter offers a 2000:1 turndown with specified measuring accuracy. It also offers a rapid response time with no obstructions, and is suitable for applications with process temperatures up to 176#176F and pressures up to 580 psig.
