

Peristaltic Pumps

The Masterflex B/T RapidLoad line of direct drive peristaltic pumping systems are designed for high volume, high accuracy bulk fluid transfer and dispensing applications. The pump line offers flow rate capacities to 9.5 GPM and is available in a wide range of models, including fixed or variable speed, analog or digital, hazardous duty, air-powered, wash down, and CIP/SIP-capable systems. The pump head features an innovative occlusion system for quickly and easily loading tubing without tools, or lubrication.
