

Respirator Accesories

The complete line of cleaning, storage and testing accessories for respirator users includes wall cases and storage bags, wipes, cleaning kits, and respirator fit test kits. Wall-mounted cases protect respirators against harsh plant environments. Respirator cleaning pads are individually packaged towelettes containing 70 percent Isopropanol and are designed for use on rubber respirator masks and other personal safety equipment. The smoke fit test kit includes all the material needed to perform OSHA-accepted qualitative fit tests for air purifying respirators.
