

Vacuum Suction Cups

Vacuum suction cups are offered in 12 major materials and several hardnesses within each material to coincide with specific applications. Included are silicone for high heat, nitriles for general purpose, polyurethane blends for abrasion-resistance, ESD silicone for electronics, gum rubber for paper handling, proprietary Nomathane, a silicone-free, non-marking hybrid for handling hot items, and vinyl for light-duty use. Available in sizes ranging from miniature to several feet long, depending upon the material, the suction cups are suitable for virtually any vacuum material handling requirement.

Hudson, MA, 800-654-3500
