

## Globe Valves

Clampseal valves are available in sizes up to 4 in. in Y, angle, or T-patterns and in ASME pressure classes up to 4500#. The valves feature a quick-change packing chamber and pressure seal bonnet that allow for fast in-line serviceability and lower exposure to radiation. A choice of SA105 carbon steel, F22 low alloy, F316 and F347 stainless steel and other materials are available, with virtually any end connection.
