

Valve/Actuator Packages

"Painless stainless" valve/actuator packages are designed as no-wait solutions for chemical, corrosive and caustic environments. The all-stainless packages combine 316 SS ball valves with 316 SS rack-and-pinion actuators. Shipped pre-assembled, ready for installation, the stainless packages make valve ordering and installation fast for maintenance, engineering and purchasing staffs in the pharmaceutical, food, beverage, pulp and paper, and petrochemical industries.
