

Centrifuges for Dewatering and Thickening

At WEFTEC: Flottweg, a global supplier based in Germany of decanter centrifuges, exhibited its new high-solids decanter centrifuges for dewatering and thickening applications. Design features include low-energy-use independent bowl and scroll drives, two-layer sound covers for low-sound emission, sizes to suit large and small facilities, all stainless steel wetted parts, and PLC control systems. Information about Flottweg products is available in the U.S. from KMPT USA.

KMPT USA, Florence, KY; 203-838-6120
