

Ludeca: Training Center

Ludeca has opened an international training center in Doral, FL. The newly built facility features large classrooms equipped with the latest in interactive audio-visual training systems and training simulators for machinery alignment, condition monitoring, and balancing, all with dedicated laser alignment, vibration analysis, and balancing systems. The company is a vendor of preventive, predictive, and corrective maintenance tools including laser alignment, vibration analysis, and balancing as well as software, services, and training.
