

Advanced Submersible Pump Technology

ABS has introduced the EffeX range of submersible sewage pumps driven by motors that reduce energy consumption and environmental impact. According to the company, the advanced pump technology results in better reliability, fewer blockages and lower operational costs. Other features of the EffeX range include:

- Blockage resistance free solids passage of at least 75 mm.
- IE3 motor designed and tested in accordance with IEC 60034-30.
- Optimised hydraulics.
