

## University of Limerick to host Profibus seminar

Processingtalk

### **Profibus Ireland will hold an industrial-communications seminar on 20 January 2010 at the University of Limerick, Ireland.**

The seminar will provide a series of technical presentations from a variety of vendor companies.

In parallel with the seminar, a series of integrated demonstrations will showcase some of the technology areas covered in the presentations.

These include [Profinet](#) [1], [Profibus](#) [2] DP, [Hart](#) [3] on Profibus, Profibus PA, Profibus diagnostics with Profitrace 2, Wireless Hart, [OPC](#) [4], [Scada](#) [5] and many other related areas.

Participants will have the opportunity to get hands-on experience with all the demonstrations before the start of the presentation, during lunch break, and after presentations.

Hands-on sessions will also provide an opportunity to ask questions.

This is an excellent opportunity to learn and network with other automation professionals in Ireland.
