

## **Company Announces Expanded Linux Operating System Capability for More Lantronix Products**

The Associated Press

<http://www.lantronix.com> () —

Lantronix, Inc. (<http://www.lantronix.com>) (NASDAQ: LTRX), a leading provider of secure, remote management, device networking and data center management technologies, today announced the worldwide availability of the EDS1100 and EDS2100 Linux software development kit (SDK), furthering its commitment to Linux and strategy for open source computing. The new SDK allows Linux developers to quickly and easily create value-added applications on the EDS1100/2100. Built on the proven, stable 2.6 Linux kernel, the SDK includes a robust set of components for building secure network-enabled products and applications using Linux, one of the world's most popular open operating systems. Also included in the announcement are firmware updates for the XPort@ Pro Linux SDK and MatchPort@ AR Linux SDK, available for download at [www.Lantronix.com/downloads](http://www.Lantronix.com/downloads) (<http://www.Lantronix.com/downloads>) .

The EDS1100 and EDS2100 Linux SDK key improvements include:

"While we will continue to offer our customers the tools to develop products using our tried and true operating systems, expanding our Linux offerings extends the capabilities of our products for current customer needs and opens up our products to an exponentially wider audience," said Daryl Miller vice president of engineering for Lantronix. "Every new product we launch will now support Linux."

The EDS1100/2100 is also available with Lantronix' powerful operating system, Evolution OS@, which provides end-users a rich, turnkey option with robust functionality right out of the box.

About EDS1100/2100The EDS1100 and EDS2100 are unique, hybrid Ethernet terminal/multiport device servers which allow remote access to and management of virtually any IT/networking equipment or edge device such as medical equipment, POS terminals or security equipment. Available with Linux and IPv6 (<http://www.lantronix.com/device-networking/external-device-servers/eds1100-2100-linux-dev-kit.html>) or Lantronix' powerful Evolution OS (<http://www.lantronix.com/device-networking/utilities-tools/evolution.html>) , the EDS1100/2100 is the best choice when critical data needs to be remotely and securely accessed anywhere, at any time, via the Internet.
