

## **Yield Data, Variety Information and More Now Available Through Deltapinemobile.Com**

Monsanto

**ST. LOUIS (February 14, 2011)** –Cotton farmers can now access yield data, agronomic alerts, variety information and contact information for Deltapine representatives and seed dealers all from their mobile phone, thanks to the new DeltapineMobile.com.

With the click of a button, mobile web users can easily access a yield calculator to compare Deltapine® products' yield potential to competitor varieties. A planting rate calculator is available to determine proper seeding rates. The new mobile website also allows users to stay updated on the latest United States Department of Agriculture (USDA) news and commodity prices.

“The Deltapine mobile website will be an important tool for all farmers planting Deltapine seed,” said Dave Rhylander, Deltapine Marketing Lead. “Just launch the browser on your mobile device and visit [DeltapineMobile.com](http://DeltapineMobile.com) [1] to start experiencing the fastest and most convenient way to stay informed.”

For over 90 years, farmers have trusted Deltapine cotton because it is backed by the support of a company that stands behind their products. To learn more about Deltapine cotton varieties go to [www.deltapine.com](http://www.deltapine.com) [2].
