Siemens to modernize hot strip mill cooling for ThyssenKrupp Steel Europe in Duisburg-Bruckhausen

Linz, Austria, 2011-Sep-16

Siemens VAI Metals Technologies has been commissioned by ThyssenKrupp Steel Europe AG to upgrade the entire strip cooling system in its hot strip mill 1 at Duisburg-Bruckhausen in Germany to the latest state of the art. This involves the installation of a rough strip cooling system, an intensive "Power Cooling" section and a new laminar cooling unit. The value of the order is more than ten million euros and the project is due for completion by the end of 2013.
