

Corning Incorporated to Acquire Bargoa S.A.

The Associated Press

Acquisition to build on Bargoa's strong telecommunications presence in Brazil

CORNING, N.Y. - Corning Incorporated (NYSE: GLW) announced today that it has signed an agreement with Abengoa (MCE: ABG) to acquire its Brazilian subsidiary, Bargoa S.A., a leading provider of connectivity solutions for the Brazilian telecommunications sector. The terms of the agreement are not being disclosed. Pending regulatory approvals, the acquisition is expected to be completed by the end of the second quarter in 2013.

With its main activities located in Rio de Janeiro, Brazil, Bargoa provides a wide range of connectivity solutions in the rapidly growing Brazilian telecommunications marketplace. Upon closing, Bargoa will be integrated into Corning's telecommunications business segment.

Corning currently plays an active role in the telecommunications industry in Brazil, the largest economy in Latin America, and sixth largest economy in the world. The acquisition will strengthen Corning's telecom activities in the region - building on Bargoa's strong brand, high-quality manufacturing, and flexible design capabilities. These competencies complement Corning's innovative telecommunications portfolio and will enable the company to extend its leadership as a connectivity solutions company.

"We are very excited about the opportunity to expand Corning's presence in Brazil," said Clark S. Kinlin, executive vice president, Telecommunications Business Group. "Bargoa has a proven history of delivering customer-driven solutions based on excellent manufacturing capabilities. We look forward to building a bright future in the Brazilian telecom market when Bargoa's talented team joins us."

Forward-Looking and Cautionary Statements This press release contains "forward-looking statements" (within the meaning of the Private Securities Litigation Reform Act of 1995), which are based on current expectations and assumptions about Corning's financial results and business operations, that involve substantial risks and uncertainties that could cause actual results to differ materially. These risks and uncertainties include: the effect of global political, economic and business conditions; conditions in the financial and credit markets; currency fluctuations; tax rates; product demand and industry capacity; competition; reliance on a concentrated customer base; manufacturing efficiencies; cost reductions; availability of critical components and materials; new product commercialization; pricing fluctuations and changes in the mix of sales between premium and non-premium products; new plant start-up or restructuring costs; possible disruption in commercial activities due to terrorist activity, armed conflict, political or financial
