

OneNeck(R) IT Services, a Leading Microsoft Dynamics AX Hosting Provider, Announces User-Based Cloud Hosting Program for AX 2012

The Associated Press

OneNeck® IT Services, a leading Microsoft Dynamics AX hosting provider, announces that it has launched a user-based hosting program for companies wishing to run AX 2012 in the Cloud.

OneNeck currently provides a private cloud approach for hosting and managed services for Dynamics AX on a one-to-one, customer-centric manner with dedicated AX environments for each customer. The AX in the Cloud Hosting Program is for customers looking for an entry to AX 2012. It provides per-user, per-month based pricing starting at five users. AX in the Cloud is on a high availability architecture (HAA), designed for flexibility, security, reliability, and 99.9% availability.

"Our mission is to offer our customers a wide portfolio of Dynamics AX solutions," stated Chuck Vermillion, CEO of OneNeck. "By launching a user-based pricing model, we are able to offer an AX in the Cloud hosting solution to small and midsize businesses that provides flexibility from CapEx to OpEx."

OneNeck has been providing hosting and managed services to the Microsoft stack since 1997 and is one of the largest Dynamics AX hosting and application management companies in the U.S. As a Microsoft Gold Partner with unmatched AX expertise, proven experience and numerous customer references, OneNeck is committed to providing innovative Dynamics AX solutions to its customers.

To learn more about OneNeck's AX in the Cloud solution and user-based hosting stop by booth #347 at Microsoft's Convergence 2013 March 18-21 in New Orleans.
