

Membrana

Membrana has announced that another Liqui-Cel Membrane Contactor system for oxygen removal is being shipped to Korea. The system utilizes Liqui-Cel 10 x 28 Membrane Contactors to provide a dissolved oxygen outlet of no greater than 1 ppb. The system will operate in combo mode using nitrogen and vacuum. Liqui-Cel Membrane Contactors are used around the world for adding or removing oxygen, carbon dioxide, and nitrogen to or from different liquids. Membrana is a wholly owned subsidiary of Polypore Inc. in Charlotte, NC.
