

Vacuum Mixing and Homogenizing

The Olsa 300 Liter Vacuum Mixer Homogenizer is a standalone plant that includes self-contained vacuum, temperature control, and CIP systems. Agitation is provided by independently controlled inner and outer counter-rotating agitators and a bottom-entering, high-speed homogenizing turbine for batch-to-batch reproducibility of pharmaceutical, cosmetic, and personal care products. All product contact surfaces are mirror-polished, and all exterior surfaces are stainless steel.

Olsa USA, Hauppauge, NY; 631-588-6572
