Vacuum Conveyors (1776)

C-Series vacuum conveyors powered by pneumatically driven vacuum pumps transport up to 10-15 tons/hour of powders and granules. They are made of stainless steel AISI 316L and can cope with the most demanding circumstances. The filter design can trap particles down to 0.3 microns and can be equipped with a HEPA filter. In addition, C-21 and C-33 conveyors have been examined and accepted by the USDA and comply with the 3A standard.
