Digital Pressure Gauge

The AccuGauge AG200 media-isolated, digital pressure gauge offers a 4–20 mA output signal complete with a large LCD display. The gauge can display each of the following measuring units with the push of a button: psi, bar, kg/cm, ATM, inches H₂O and Hg. It also offers the option to view the 4-20 mA output signal on the LCD display. By utilizing the “test” button, the user can evaluate the loop current to ensure the system is set up correctly, as well as to adjust the current in two milliamp increments.
