

Horizontal Peeler Centrifuge

This horizontal peeler centrifuge has been designed to meet the increasing demands of pharmaceutical production. It's equipped with an extra deep basket design that provides a larger filtration/separation area than conventional equipment. The unit's other key design specifications include automated cleaning, a heel discharge system, and separation between the process and technical areas of the machine.

Heinkel, Swedesboro, NJ; 856-467-3399; www.heinkelusa.com

Editor's Note: The unit is designed for frequent product change-over, fast start-up, and quick post process and cleaning inspection.
