## Linear Position Sensor

The Temposonics model RF sensor includes all the outputs (including EtherCAT and SSI) and other enhanced features of the R-Series but is housed in Teflon coated stainless steel that can be bent to an 8-in. minimum radius and allows for up to 15 to 20 position magnets to be used along a single sensor. The sensor now accommodates strokes up to 10 meters, with a measuring range of 255 mm to 10,060 mm.
