

Fluoropolymer Convolute Tubing

PTFE, FEP, and PFA convolute tubing comes in a variety of designs and configurations from 1/8 to 4 in. and includes MIL spec convolute tubing for electrical conduit (SAE AMS-T-81914), Convo-Tex wire-wrapped convolute tubing, low-profile convo (larger inside diameter), heavy wall convo (thicker wall to handle more pressure), and conductive convolute for static dissipation or conductance. Tubing can be customized to application requirements, designing around pitch configurations and tolerances.
