## **A More Complete Enclosure Solution**

Hoffman has formed a strategic partnership with Wöhner to offer its modular 60-mm busbar system. Hoffman provides enclosure solutions, and the addition of the easy-to-use 60-mm busbar system gives customers a more complete solution. A busbar system uses 3 copper bars, attached to end supports connected to the back panel, to distribute power throughout enclosures. Electrical components are mounted onto adapters that snap onto the busbars, establishing an electrical connection and mechanically fastening in 1 step. The company notes that the system is also highlighted by:
