

Donaldson Torit

Intended to collect dust in chemical, pharmaceutical, cosmetic, textile, grain and other applications, Ultra-Web SB nanofiber filter media combine surface-loading functionality with dust-release capabilities to create filter cartridges that boast of both efficiency and lower pressure drop.

Nanofiber filter media for cartridge filtration

Fine and fibrous particulate, such as dust

A high air flow capacity and low pressure resistance across filter media

Operation in high temperatures and a spunbond substrate with a PTFE membrane
