

An All-Plastic Valve For Heavy-Duty Apps

[Hayward Flow Control Systems](#) [1], a division of Hayward Industrial Products, introduces its line of compact ball valves for a range of heavy-duty chemical, water and wastewater applications. According to the company, the QVC and QTA ball valves offer:

- A rugged, all-plastic design.
- A 150-PSI pressure rating.
- Easy quarter-turn operation.
- Socket or threaded pipe connectors.
- Santoprene (TPV) seats.
- Full porting.
- Availability of QVC valves in 1/2- to 4-in. sizes and QTA valves in 1/2- to 2-in. sizes.
- Your choice of gray or white PVC.
- A compact design to fit into small spaces.
