

Elimination Of Exposure To Hazardous Materials

[HAPMAN](#) [1] introduces its fully self-contained bag dump station that virtually eliminates employee exposure to dusty bagged materials within your process. These stations additionally offer:

- A pneumatically powered bag compactor, which is attached, to provide better containment and control in the disposing of hazardous material bags.
- A dust collection system that keeps product confined within your process.
- Fully enclosed gloved access.
- A view port.
- No need for an external air source.
- Availability of sealed control systems for applications in which periodic washdowns are required.
- HAPMAN's exclusive Performantee performance guarantee.
