

Accelerating Compliant Accelerometer Use (6102)

Wilcoxon Research recently launched 6 Class I, Div. 2 (Zone 2) accelerometers, as well as 3 compatible cable-connector assemblies suitable for installation in Class I, Div. 2 environments. The 6 vibration sensors incorporate sensitivities of 100 millivolts/gram and sensitivity tolerances of 5 percent. Not only are they CSA certified to be rated for use in Class I, Div. 2, Groups A, B, C, D, E, F and G environments, but they are also ATEX certified for operation in Class I, Zone 2 AEx na IIC T4. Models include:

Each cable connector can be lock wired to prevent it from inadvertently backing off the sensor. The series consists of:
