

Armadillo Airlock Valve

Aerodyne® has announced the addition of the Vacu-Valve® Armadillo, a closed construction airlock valve that provides positive seal under hoppers, cyclones and dust collectors. This dust-discharge valve:

- Requires no controls, lubrication or power source.
- Is maintenance free.
- Uses a duckbill valve design, allowing free-flowing continuous discharge.
- Is offered in carbon or stainless steel construction.
- Has sleeves available in neoprene, viton and white nitrile.
