

Hi-Res Temperature Sensor Module

The PT-104 is a 4-channel, temperature data acquisition module for use with Pt100 and Pt1000 RTD sensors. This high accuracy and high resolution unit:

- Measures temperature, resistance, and voltage.
- Doesn't require a power supply.
- Is CE compliant.
- Uses RS-232 or USB interfaces (USB interface via Included RS-232 to USB interface converter).
- Includes Windows software for basic data acquisition and display.
