

Enhanced Reporting For ERP Software (6470)

Version 11.0 of Deacom, Inc.'s DEACOM integrated accounting and enterprise resource planning (ERP) software system for internal and external reporting includes upgraded functionalities such as:

- New dashboard features that allow users to compile an infinite number of reports into a single summary screen and set a target value for each report.
- Cube groups that allow users save reports for export to third-party reporting tools, such as Crystal Reports.
